ZADCOM SCRAP MANAGEMENT

Welcome to Zadcom, your sustainable source for responsible scrap solutions. We specialize in efficient scrap collection, expert recycling, and specialized demolition services, contributing to a cleaner, greener future across Saudi Arabia.

Dammam, Kingdom of Saudi Arabia

OUR EXPERTISE

At Zadcom, we don't just collect scrap; we empower a sustainable and greener future for the Kingdom through responsible scrap management and recycling. Partner with us today for a cleaner, more eco-friendly tomorrow.

COMPREHENSIVE SCRAP COLLECTION: Zadcom Scrap Management is your trusted partner when it comes to scrap metal collection. We take pride in our ability to collect scrap metals of any quantity, from any location within the Kingdom. Our extensive network and logistics expertise ensure efficient and timely scrap collection.

WIDE RANGE OF FERROUS AND NON-FERROUS MATERIALS: Our expertise extends to handling a diverse array of scrap materials, including a wide range of ferrous and non-ferrous metals. We deal with all types and grades of materials, including but not limited to copper, nickel, brass, stainless steel, carbon steel, steel billets, aluminum, and e-waste.

SPECIALIZED DEMOLITION SERVICES: Beyond scrap collection, we excel in specialized demolition services. Our team of experts is equipped to handle the demolition of metal structures, industrial machinery, and entire plants. We ensure that the demolition process is not only efficient but also environmentally responsible.

RECYCLING EXCELLENCE: We collaborate with state-of-the-art recycling facilities to maximize the reuse of materials, thereby reducing waste and promoting a sustainable circular economy. Our commitment to recycling extends to all materials, making us leaders in responsible waste management.

ZADCOM COMPANY FOR INDUSTRIAL TRADING

OUR VERSATILE MATERIAL PORTFOLIO

STAINLESS STEEL

From the corrosion-resistant properties of 300 series stainless steel to the strength of 400 series steel, we handle all grades with expertise. Stainless steel, renowned for its durability and aesthetics, finds new life through our recycling processes.

CARBON STEEL

Carbon steel, a fundamental material in construction and industry, comes in various grades. Whether it's light or heavy, we have the capabilities to collect and recycle carbon steel efficiently, contributing to resource conservation.

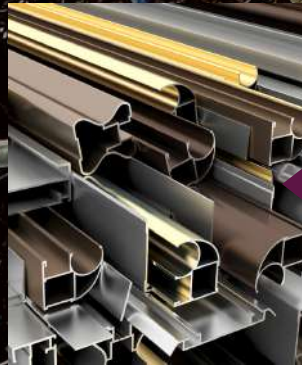

COPPER

Copper is one of the most versatile and valuable metals in the scrap industry. We accept copper in any form, from wiring and piping to components and alloys. Our commitment to responsible copper recycling extends to its various applications.

ALUMINIUM

Aluminium, known for its lightweight strength and corrosion resistance, is a vital material in numerous industries. Regardless of its form, we ensure that aluminium finds its way to responsible recycling, conserving energy and resources.

E-WASTE

In today's digital age, electronic waste (e-waste) poses unique challenges. At Zadcom, we address this growing concern with specialized recycling processes. Old electronics find new life as valuable raw materials, mitigating environmental impacts.

OTHERS

Our expertise extends beyond the aforementioned materials. We handle a myriad of other metals that play crucial roles in various sectors. From brass and nickel to lead and titanium, we possess the knowledge and capabilities to responsibly recycle these metals, reducing waste and promoting sustainability.

LET'S CONNECT WITH US

Zadcom embodies a vision of responsible and sustainable scrap management that transcends the boundaries of conventional waste practices. Our commitment to excellence and environmental stewardship is at the core of our operations, shaping our identity as a pioneer in the Kingdom of Saudi Arabia's scrap solutions landscape.

Our expertise extends to a wide range of materials, including non-ferrous metals such as copper, nickel, and stainless steel, as well as ferrous materials like steel and iron. Additionally, we address the increasingly important issue of electronic waste (e-waste), a byproduct of our digital age that demands responsible disposal and recycling.

We invite you to join us in our journey to transform industry practices, promote a circular economy, and make a meaningful difference in the Kingdom and beyond. Together, we are redefining the possibilities of scrap materials and shaping a more sustainable world for generations to come.
